## HTML Tags Ordered Alphabetically

Tag	Description
<u><!--</u--></u>	Defines a comment
	Defines the document type
<u><a></a></u>	Defines a hyperlink
<abbr></abbr>	Defines an abbreviation or an acronym
<acronym></acronym>	Not supported in HTML5. Use <abbr> instead.</abbr>
	Defines an acronym
<address></address>	Defines contact information for the author/owner of a document
<applet></applet>	Not supported in HTML5. Use <embed/> or <object> instead.</object>
	Defines an embedded applet
<area/>	Defines an area inside an image-map
<article></article>	Defines an article
<aside></aside>	Defines content aside from the page content
<audio></audio>	Defines sound content
<u><b></b></u>	Defines bold text
<base/>	Specifies the base URL/target for all relative URLs in a document
<basefont/>	Not supported in HTML5. Use CSS instead.
	Specifies a default color, size, and font for all text in a document
<u><bdi></bdi></u>	Isolates a part of text that might be formatted in a different direction from other text outside it
<bd><bdo></bdo></bd>	Overrides the current text direction
 big>	Not supported in HTML5. Use CSS instead.
	Defines big text
                                                                                                                                                                                                                                                                                                                                                     	Defines a section that is quoted from another source
<body></body>	Defines the document's body
                                                                                                                                                                                                                                                                                                                                                     	Defines a single line break

≤code>       Defines a piece of computer code <col/> Specifies column properties for each column within a <colgroup> element         <colgroup>       Specifies a group of one or more columns in a table for formatting         <ddatalist>       Specifies a list of pre-defined options for input controls         <dd><dd>&gt;       Defines a description/value of a term in a description list         <dde>       Defines text that has been deleted from a document         <details>       Defines additional details that the user can view or hide         <dfin>       Represents the defining instance of a term         <dialog>       Defines a dialog box or window         <diir>       Not supported in HTML5. Use <ul> instead. <pre>content</pre>		Defines font, color, and size for text
<pre><frame/></pre> Not supported in HTML5.	<footer></footer>	Defines a footer for a document or section
	<form></form>	Defines an HTML form for user input
Defines a window (a frame) in a frameset	<frame/>	Not supported in HTML5.
		Defines a window (a frame) in a frameset

<frameset></frameset>	Not supported in HTML5.
	Defines a set of frames
<h1> to <h6></h6></h1>	Defines HTML headings
<head></head>	Defines information about the document
<header></header>	Defines a header for a document or section
<hr/>	Defines a thematic change in the content
<html></html>	Defines the root of an HTML document
<i>&gt;</i>	Defines a part of text in an alternate voice or mood
<iframe></iframe>	Defines an inline frame
<img/>	Defines an image
<input/>	Defines an input control
<ins></ins>	Defines a text that has been inserted into a document
<kbd></kbd>	Defines keyboard input
<keygen/>	Defines a key-pair generator field (for forms)
<label></label>	Defines a label for an <input/> element
<legend></legend>	Defines a caption for a <fieldset> element</fieldset>
<u><li></li></u>	Defines a list item
< <u>link&gt;</u>	Defines the relationship between a document and an external resource (most used to link to style sheets)
<main></main>	Specifies the main content of a document
<map></map>	Defines a client-side image-map
<mark></mark>	Defines marked/highlighted text
<menu></menu>	Defines a list/menu of commands
<menuitem/>	Defines a command/menu item that the user can invoke from a popup menu
<meta/>	Defines metadata about an HTML document
<meter></meter>	Defines a scalar measurement within a known range (a gauge)
<nav></nav>	Defines navigation links
<noframes></noframes>	Not supported in HTML5.
	Defines an alternate content for users that do not support frames
<noscript></noscript>	Defines an alternate content for users that do not support client-side scripts
<object></object>	Defines an embedded object
<u>&lt;0 &gt;</u>	Defines an ordered list

<optgroup></optgroup>	Defines a group of related options in a drop-down list
<option></option>	Defines an option in a drop-down list
<output></output>	Defines the result of a calculation
<u></u>	Defines a paragraph
<pre><param/></pre>	Defines a parameter for an object
<pre><pre>&lt;</pre></pre>	Defines preformatted text
<pre><pre><pre><pre><pre><pre><pre><pre></pre></pre></pre></pre></pre></pre></pre></pre>	Represents the progress of a task
<u><q></q></u>	Defines a short quotation
<u><rp></rp></u>	Defines what to show in browsers that do not support ruby annotations
<u><rt></rt></u>	Defines an explanation/pronunciation of characters (for East Asian typography)
<ruby></ruby>	Defines a ruby annotation (for East Asian typography)
<u>&lt;2&gt;</u>	Defines text that is no longer correct
<samp></samp>	Defines sample output from a computer program
